- Questions for final examination in anatomy (1. LF, Dentistry)
- Topics of seminars in anatomy

Institutes

- Institute of Anatomy, the First Faculty of Medicine (<http://nat.lf1.cuni.cz/aindex.html>)

Anatomy - systems

Urinary system

- Kidney
 - Renal Blood Vessels and Renal Segments
 - Renal Pelvis and Calices
 - Structure of Kidney
 - Gerota's Fascia
- Ureter
- Urinary bladder

Musculoskeletal system

Muscles

- Mimic Muscles and Platysma
- Pectoralis Major • Deltoid Muscle • Teres Minor • Teres Major
- Embryonic Development of Muscles

Bones

- Upper limb
 - Shoulder Girdle
 - Scapula
 - Clavicle

Nervous system

- Axon
- Cerebrospinal Fluid
- Dendrite
- Meninges
- Cervical Sympathetic System
- Prosencephalon
- The limbic system

Digestive system

- Salivary glands - description, syntopy, innervation
- Portocaval Anastomosis
- Pancreas
- Gallbladder and Extrahepatic Bile Ducts

Reproductive system

Female:

- Ovary
- Uterus
- Vagina

Male:

- Penis
- Scrotum and Coverings of Testis
- Descent of Testis
- Prostate

Cardiovascular system

- Human Fetal Circulation
- External Carotid Artery

Respiratory system

- Pneumothorax

Immune system

- Tonsills

Topographical anatomy

Head and neck

- Parapharyngeal Space • Spatium Retropharyngeum • Carotid Triangle • Scalene Fissure • Trigonum Submandibulare • Trigonum Pirogovi
- Spatium Massetericomandibulare and Perimandibular Abscess

Lower limb

- Suprapiriform Foramen • Infrapiriform Foramen • Vascular Lacuna • Muscular Lacuna • Femoral Triangle • Adductor Canal • Adductor Hiatus • Popliteal Fossa • Tarsal Tunnel
- Inguinal Hernia

Upper limb

- Clavipectoral Triangle • Triangular Space • Quadrangular Space • Axilla • Cubital Fossa • Carpal Tunnel • Radial Fossa
