

# Category:Embedded articles

## Pages in category "Embedded articles"

The following 200 pages are in this category, out of 251 total.

(previous page) (next page)

### A

- A descriptive study
- Acute mediastinitis
- Acute thyroiditis
- Acute Tubular Necrosis
- Allergy
- Amino Acids (1.LF UK, NT)
- Aorta thoracica
- Autoregulation of cerebral perfusion

### B

- Baroreception sensitivity
- Baroreflex
- Basic tests in hematology (pediatrics)
- Benign salivary gland tumors
- Bile duct tumors
- Blood clotting examination
- Blood-brain barrier
- Breakdown and synthesis of glucose
- Bronchiectasis (1.LF)

### C

- C-reactive protein
- Carbon oxides
- Cardiac inflammations (pediatrics)
- Cardiac tamponade (pediatry)
- Cardiogenic shock (pediatrics)
- Cephalhematoma
- Chalazion
- Chemical Reactions (FBLT)
- Chemical reactions in metabolism
- Childbirth
- Chronic mediastinitis
- Chronic subdural hematoma
- Chronic subdural hematoma / PGS / diagnostics
- Chronic tubulointerstitial nephritis
- Classification and structure of carbohydrates
- Classification and structure of lipids
- Classification and structure of proteins
- Classification of shock (pediatrics)
- Coagulation versus agglutination
- Color of fabrics
- Color of substances
- Compartmentation of metabolic events
- Compomer
- Compton scattering
- Correction and compensation of acid-base imbalances
- Creating Production and other handling of child pornography
- Cuvette
- Cytoskeleton

### D

- Descriptive statistics
- Determination of ascorbate in urine
- Determination of glucose in urine
- Dilated cardiomyopathy
- Disease from excess or deficiency of nutrients
- Diseases resulting from nutrient deficiencies

- Disinfection and sterilization
- Disorders of lysosomal metabolism / Deficiency of enzyme activators of lysosomal hydrolases
- Disorders of tryptophan syndrome
- Distortion
- Duodenal obstruction

## E

- Electrochemical Equilibrium
- Electron transport chain (FBLT)
- Electron Transport Chain (FBLT)
- Embden-Meyerhof-Parnassus pathway
- Endocardium
- Endoplasmic Reticulum
- Enzyme cofactors
- Enzyme inhibition
- Enzyme specificity
- Ergotherapy
- Erosion (Dentistry)
- Esophagus development
- Examination of cerebellar function
- Examination of the taxa of the lower limbs

## F

- First lower Molar
- First lower premolar
- First upper Molar
- First week of human development
- Fluorimetry
- Formation of ketone bodies
- Formulation of hypotheses
- Fragile X syndrome
- Fructose Metabolism
- Fructose Metabolism (FBLT)
- Fundamentals of Metabolic Pathway Regulation

## G

- General structure of enzymes
- General structure of nervous tissue
- Gibbs energy (FBLT)
- Glucose Formation
- Glucose in the urine
- Golgi Apparatus
- Golgi apparatus
- Growth hormone (secretion)

## H

- Haematopoiesis (paediatrics)
- Health risks from water
- Hemorrhagic stroke / PGS / diagnostics
- Hemorrhagic strokes
- Henderson-Hasselbalch equation
- Hordeolum
- Hyaline dystrophy
- Hyperplasia
- Hypochloraemia

## I

- Immunopathological reaction III. type
- Immunopathological reaction IV. type
- Immunopathological reaction type I
- Infections caused by HHV-6 and HHV-7
- Infective endocarditis (pediatrics)
- Inflammation of the eyelids
- Invasive blood pressure monitoring (pediatrics)
- Iodine deficiency
- Ischemic stroke/PGS/diagnosis
- Isoprenoids

## K

- Karzinom ledviny
- Kefalhematoma
- Ketones in the urine
- Kinetics
- Krabbe disease

## L

- Lack or loss of sexual desire
- Lectin pathway of complement activation
- Left bundle branch block
- Lipid breakdown and metabolism of ketone bodies
- Lipids as an energy source
- Liver tumors
- Loop diuretics
- Lower premolars
- Lumbar plexus
- Luminescence methods
- Luminimetry
- Lysosomal Diseases
- Lysosomes

## M

- Macroergic compounds
- Macroscopic manifestations of inflammation
- Malignant tumors of the skeleton
- Masochism
- Mechanism of action of enzymes
- Mediastinitis
- Methemoglobin
- Midbrain
- Mitochondria
- Mitochondria and their structure
- Molars
- Mucous dystrophy
- Mycotoxins (1. LF UK, NT)
- Myocardial perfusion scintigraphy

## N

- Neuron
- Nursing in ancient Rome

## O

- Obstructive shock (pediatrics)
- Odontoblast
- One-dimensional echocardiography
- Oral cavity
- Orbital compartmentation
- Organic aciduria
- Orgasm disorders in women
- Orthostatic reaction
- Overview of Energy Metabolism
- Oxidation and the role of oxygen
- Oxyhemoglobin and deoxyhemoglobin

## P

- Pathological sexual aggression
- Pedophilia
- Pentose cycle (FBLT)
- Pentose cycle, metabolism of fructose, galactose and glucuronic acid
- Peptides (1. LF UK, NT)
- Peritoneal dialysis
- Pes calcaneovalgus
- Plasma cell myeloma
- Pleural puncture (pediatrics)
- Pleural puncture and drainage (pediatrics)
- Pleurisy
- Poliomyelitis anterior acuta
- Polypeptide signal sequence, free and bound ribosomes

- Position dog varus
- Position of organs in energy metabolism
- Premolar
- Premolar Teeth
- Prenatal period
- Primary ciliary dyskinesia
- Principles of care for the patient in shock (pediatrics)
- Proteinuria typing

## R

- Radiodiagnostic examination of the esophagus and stomach
- Radionuclide examinations of the heart
- Radius
- Reaction Rate
- Redox potential (FBLT)
- Relative density of urine
- Reliability
- Requirements for examination techniques
- Requirements for the quality of drinking water
- Respiratory Chain and ATP Generation (FBLT)
- Rib cage
- Ribs

## S

- Sebaceous Glands
- Second lower Molar
- Second lower premolar
- Second upper Molar
- Sekretin
- Septic shock (pediatry)
- Sexual coercion
- Sexual dysfunction in women
- Sexual murder
- Sexual preference disorders
- Sexual relations between doctors and patients
- Shock (pediatrics)
- Shock classification (pediatrics)
- Sialoadenitis
