

# Foramen ischiadicum majus

The **foramen sciaticum majus** is the opening leading from the pelvis between the **ligamentum sacrotuberale** (dorsal and medial boundaries), **the ligamentum sacrospinale** (caudal boundaries) and the **incisura ischiadica major ossis coxae** (ventral and lateral boundaries).

## Passing through:

- *piriformis muscle*, which divides the area into two parts: *foramen suprapiriforme*, *foramen infrapiriforme*.
